CHAPTER SURVEY

The IRS has just signed a five year extension of the free file initiative. The program is designed to allow over 70% of the tax returns to qualify for this service and the IRS's goal is to reach that targeted level. We would like your opinion. Your response is important and the survey results will be in the July newsletter and will be sent to the National office.

Please reply by July 15 to: confidential1227@aol.com

1. If the IRS reaches their targeted free file goal of handling 70% of the tax returns it will significantly impact your practice.

Strongly agree Somewhat agree Neutral Disagree Strongly disagree

2. If the IRS reaches their targeted free file goal of handling 70% of the tax returns, and you make no changes to your product/service offerings, your practice will no longer be economically sustainable.

Strongly agree Somewhat agree Neutral Disagree Strongly disagree

3. The tax laws are simple and straight forward enough that anyone using the free file option regardless of their tax expertise, will be able to properly complete their return and pay the least tax allowed under the law.

Strongly agree Somewhat agree Neutral Disagree Strongly disagree

4. The National Association of Tax Professionals should take a more pro active role in limiting or trying to stop government intrusion via free file, etc., in the business of tax preparation in the private sector.

Strongly agree Somewhat agree Neutral Disagree Strongly disagree

Thank you,
